

# Microsoft Security Workshops

**Fully funded by Microsoft. Delivered by TIEVA. Designed around your business.**

**Cybersecurity isn't just a technical challenge, it's a business priority. But knowing where to start, which tools to invest in, and how to get buy-in from stakeholders isn't always straightforward.**

That's where Microsoft Security Workshops come in. Provided at no cost through Microsoft's funding and delivered by TIEVA, these practical sessions help you assess your security posture, explore technologies that fit your environment, and build clear, actionable outcomes. Whether it's roadmaps, pilot opportunities, or tangible next steps, you'll walk away with insight that drives both stronger security and better business alignment.

## Explore Our Security Workshops

Each workshop is delivered by TIEVA's security specialists and aligned to your priorities. Choose the one that best fits your focus, or combine sessions for a more complete picture.

### Modern SecOps Workshop

Legacy SIEMs can't keep pace with today's threats. This workshop reveals how to bring unified visibility, automation, and agility to your security operations. You'll explore real-world use cases, assess your current SOC performance, and build a roadmap to modernise operations.

### Data Security Workshop

Data is growing faster than ever, and so are the risks. In this session we'll help you identify where sensitive information lives, uncover insider risks, and evaluate your compliance posture. You'll gain actionable insights and a prioritised plan to improve governance and reduce risk.

### Threat Protection Workshop

DataCyberattacks are evolving daily, from phishing and ransomware to identity-based threats. This workshop helps you uncover vulnerabilities, prioritise risks, and map threats to Microsoft 365 Defender's protection capabilities. You'll leave with a clear strategy, visibility into active threats, and recommendations to accelerate improvements.

# Microsoft Security Workshops

## Why Book Now?

Microsoft has recently expanded funding for these workshops, but availability is limited. Securing a session now means your organisation can:

- Identify the right technologies aligned with your current environment
- Engage stakeholders with real use cases and business outcomes
- Accelerate progress through clear roadmaps and opportunities for pilots
- Strengthen security with actionable steps tailored to your organisation

Delivered by TIEVA's expert team, these workshops are a chance to make meaningful progress on your security strategy – without the cost barrier.

Take advantage of this funded programme while places last.  
Speak to TIEVA today to book your Microsoft Security Workshop.
