

Accelerate innovation and unlock business benefits faster with TIEVA's Cloud Migration services.

Moving to the cloud is not just a shift in technology; it's a transformative strategy that propels your business towards rapid innovation and tangible benefits. When you see the cloud as an enabler for driving greater business outcomes, remarkable things happen. To ensure your success, we're here to guide you through every step of your cloud adoption and migration journey

Why Move to the Cloud?

The Cloud is now a foundational platform for delivering business operations and applications. Key drivers for cloud migration include:

Protect and Grow Revenue:

A well-defined cloud strategy will enable your business to meet its strategic objectives and drive growth.

Deliver Business Value:

Legacy and inefficient services can impede growth, increase costs, reduce productivity, and lead to a poor customer experience. A robust cloud strategy helps your business achieve cost efficiencies and potential savings.

Improve Security and Compliance:

Ensuring the protection of your business and maintaining compliance is crucial. Companies of all sizes are potential targets, and their operations, brand, reputation, and revenue are at risk from cyber threats.

Drive Agility and Scalability:

Responding to and anticipating business demands requires agility and scalability. A cloud strategy addresses current requirements while building a scalable approach to meet future needs.

Understanding Cloud Complexity

The cloud landscape has evolved beyond Private, Hybrid, Public Cloud to encompass additional services including Sovereign, Multi, and Industry Clouds. With business leaders under increasing pressure to drive innovation with operational efficiency to deliver outcomes faster, the need for proven methodologies, experience, and expertise to navigate all these options and address complex cloud business cases has never been greater.

Why TIEVA?

Leveraging insights from our detailed Cloud Assessments, our cloud consultants follow TIEVA's advanced F.R.A.M.E methodology to plan and deliver end-to-end cloud migration. Combining industry expertise with proven tools and technical capabilities to ensure fast, secure, and effective migrations. From strategic consultation to platform selection, cost modelling, operational design, and ongoing management, we deliver comprehensive support at every step of your migration journey.

The 6 Steps of Our Migration Service

STEP 1 Mobilisation:

- Assemble a project team with representation from both your organisation and Tieve's Cloud specialists.
- Create a single Project Plan with shared information repositories.
- Establish a regular cadence for project status and progress.status and progress.

STEP 2 High-Level Design (HLD):

- Conduct workshops covering Business, Technical, Platform, and Workload topics, led by TIEVA specialists.
- Generate critical design decisions for project success.
- Present and approve the HLD.

STEP 3 Landing Zone Setup:

- Leverage Tieve's proven Reference Architecture for Landing Zone set-up.
- Build, test, and deploy the Platform and/or Workload Landing Zone.

STEP 4 Migration Plan:

- Document the schedule for workload migrations, align resources, and prepare roll-back plans.
- Detail all roles and responsibilities to ensure a successful Migration.
- Plan to minimise or eradicate any business downtime during the migration process.

STEP 5 Migration:

- Perform migrations.
- Test against established success-criteria.
- Ensure deployment to the Landing Zone.

STEP 6 Handover:

- Provide comprehensive documentation and materials.
- A team review within 90 days to ensure cloud services perform as planned.
- Options for ongoing support and managed services (available as separate agreements)
