Move to the cloud with clarity, confidence, and purpose.

Why Assess?

Before embarking on a cloud migration or modernisation project, it's crucial to have clarity on your reasons why. At TIEVA, we partner with you to understand your unique business goals and challenges, revealing the potential within your current environment.

Our comprehensive cloud assessment provides detailed analysis and strategic insights, identifying the cloud strategy that best fuels your innovation and growth.

Working alongside your team, we review your business and IT environment to deliver valuable insights into the feasibility, risks, costs and benefits associated with cloud deployment. We provide everything you need to make informed decisions and develop a successful cloud strategy.

Outcomes include:

Align to Business Goals:
Ensure your cloud strategy fuels your business and technical objectives and unlocks possibilities for innovation and growth.

Optimised Cloud Strategy:
Leverage in-depth analysis and reports to tailor your cloud plan delivered by our experienced Cloud specialists.

Cost Efficiency:
Eliminate surprises with detailed cost modelling and projections for your cloud journey.

Dependency Mapping:
Gain a transparent overview of the relationships between workloads and infrastructure. Identify applications suitable for cloud migration and assess dependencies to deliver a clear roadmap for your cloud transformation.

Risk Assessment:
Identify and analyse potential risks, devising effective risk mitigation strategies to safeguard your journey.

Security Evaluation:
Assess security measures and requirements, developing a comprehensive security strategy for safeguarding data and applications in the cloud.

Select the Perfect Cloud Fit:
Evaluate different cloud service providers and select suitable services based on your specific organisational needs.

Our Approach to Cloud in Action

Our comprehensive cloud consultancy and assessment service is built upon the foundation of TIEVA's FRAME methodology and leverages powerful toolsets to gather the information needed to ensure a smooth and risk-free transition to your cloud destination.

Discover

Our team of cloud experts will conduct a discovery session to frame your cloud vision, explore the possibilities and all factors essential for building a compelling business case for cloud deployments.

Assess

Once the objectives are established, TIEVA will perform a comprehensive evaluation of your existing IT infrastructure and workloads. This assessment generates data that will identify workloads suitable for migration, assess dependencies between services, evaluate security and compliance needs, and more.

Consult

Our cloud consultants leverage the valuable data gathered during the assessment to offer expert guidance. We work with you to design a cloud environment and determine the optimal cloud platforms and hosting options tailored to your specific application and infrastructure requirements.

Strategy

Equipped with the insights from the discovery session, assessment, and consultation phases, we collaborate with you to develop a cloud strategy and roadmap. This roadmap is aligned with your organisation's objectives and requirements, outlining a clear path for a secure and successful cloud migration.
