

Cyber Essentials Plus Readiness Assessment

Prepare with confidence.
Certify with clarity.

Overview

Cyber Essentials Plus is a UK government-backed certification that validates your organisation's ability to defend against the most common cyber threats. Unlike the base-level Cyber Essentials, the Plus certification includes a hands-on technical assessment, making it more rigorous and involved.

The TIEVA Cyber Essentials Plus Readiness Assessment provides expert-led support to help your organisation prepare for certification — ensuring you avoid delays, rework, or failed assessments due to missing evidence or documentation gaps.

This service **does not include the certification process**, but provides a structured, best-practice review to help you gather, review, and validate the materials needed for a successful application.

What You'll Gain

By engaging with TIEVA's Cyber Essentials Plus Readiness Assessment, your organisation will:

- ✓ Gain expert-led guidance through the Cyber Essentials Plus questionnaire.
- ✓ Identify and close gaps in required evidence and documentation.
- ✓ Avoid common pitfalls that delay or prevent certification.
- ✓ Strengthen your security posture with practical, tailored recommendations.
- ✓ Demonstrate cyber maturity to customers, partners, and regulators.
- ✓ Improve your chances of success in regulated and security-sensitive supply chains.

Next Steps

Ready to prepare for Cyber Essentials Plus — the right way?

Partner with TIEVA to ensure your application is complete, compliant, and ready for certification.
