

TIEVA Security Assessments

Cyber risk doesn't just affect your IT, it puts your entire business at risk.

From ransomware to regulatory pressure, mid-sized organisations face escalating threats that demand more than basic security hygiene. Business and IT leaders are expected to protect sensitive data, maintain service continuity, and demonstrate cyber maturity, all while managing tight budgets, limited time, and stretched internal resources.

TIEVA's Security Assessments are **outcome-driven services** that provide a clear view of your current cyber maturity, along with a practical, prioritised roadmap for improvement. Delivered by experienced Cyber Security Specialists, each assessment delivers tailored insight aligned to both your business goals and technical environment.

Why Choose a Security Assessment with TIEVA?

The question isn't whether your organisation has cyber risks, it's how well you understand them.

- ✓ Gain clarity on your current cyber risk profile and maturity.
- ✓ Identify gaps in documentation, security policies, and controls.
- ✓ Receive expert, vendor-neutral advice from experienced specialists.
- ✓ Demonstrate commitment to security for stakeholders and regulators.
- ✓ Support planning for IT projects, compliance, and digital transformation.
- ✓ Stay ahead of evolving threats with insights aligned to best practices.
- ✓ Receive a detailed report, and for advanced engagements, a custom Security Roadmap.

Choose the Right Assessment for Your Needs

Every organisation is at a different stage in its cyber maturity journey. Whether you need a foundational review or deeper analysis into specific control areas, TIEVA offers two tailored assessment options to meet your goals, resources, and regulatory needs.
